## Please use the diagram to circle problem area:

Are you currently taking medications? If so, please list reason for prescription:

Is there anything else that your therapist should know about you or your needs before your session?

I understand that the Manual Lymphatic Drainage I receive is provided for the basic purpose of improving the flow of my lymphatic system and also for relaxation. If I experience any pain or discomfort during this session, I will immediately inform the practitioner so that the pressure and/or strokes may be adjusted to my level of comfort.

I further understand that Manual Lymphatic Drainage may cause reactions in some people, such as headache, nausea, lightheadedness, fatigue and on rare cases vomiting. These reactions, although normal, may last a couple of days after treatment but should dissipate. For this reason, I understand I need to drink plenty of water for the next 48-hours following treatment to keep my body extra hydrated. If these reactions continue past the two days, please contact your healthcare provider for further assistance.

Because massage/ bodywork should not be performed under certain medical conditions, I affirm that I have stated all my known medical conditions and answered all questions honestly. I agree to keep the practitioner updated as to any changes in my medical profile and understand that there shall be no liability on the practitioner's part should I fail to do so.

\*Please Note: Manual Lymphatic Drainage (MLD) is a very powerful modality and certain medical conditions are contraindicated and determine if or when, you can receive a session. After the consultation and review of the information you have provided on this form, it will be determined if MLD should be administered to you today. Some conditions will require a note from your doctor before proceeding. Please understand this is for your safety and well-being.
